#### Test room situation:

- Test room is sealed off from daylight
- Lighting situation Red, warm or cold light switching via room lighting.
- Test persons enter the test room individually and take a prepared tray from the refrigerator.
- Subject tastes at a test station. Paper-pencil or questionnaire software with monitor and keyboard possible.
- Respondent puts tray back in lock and leaves the room.

#### Training situation:

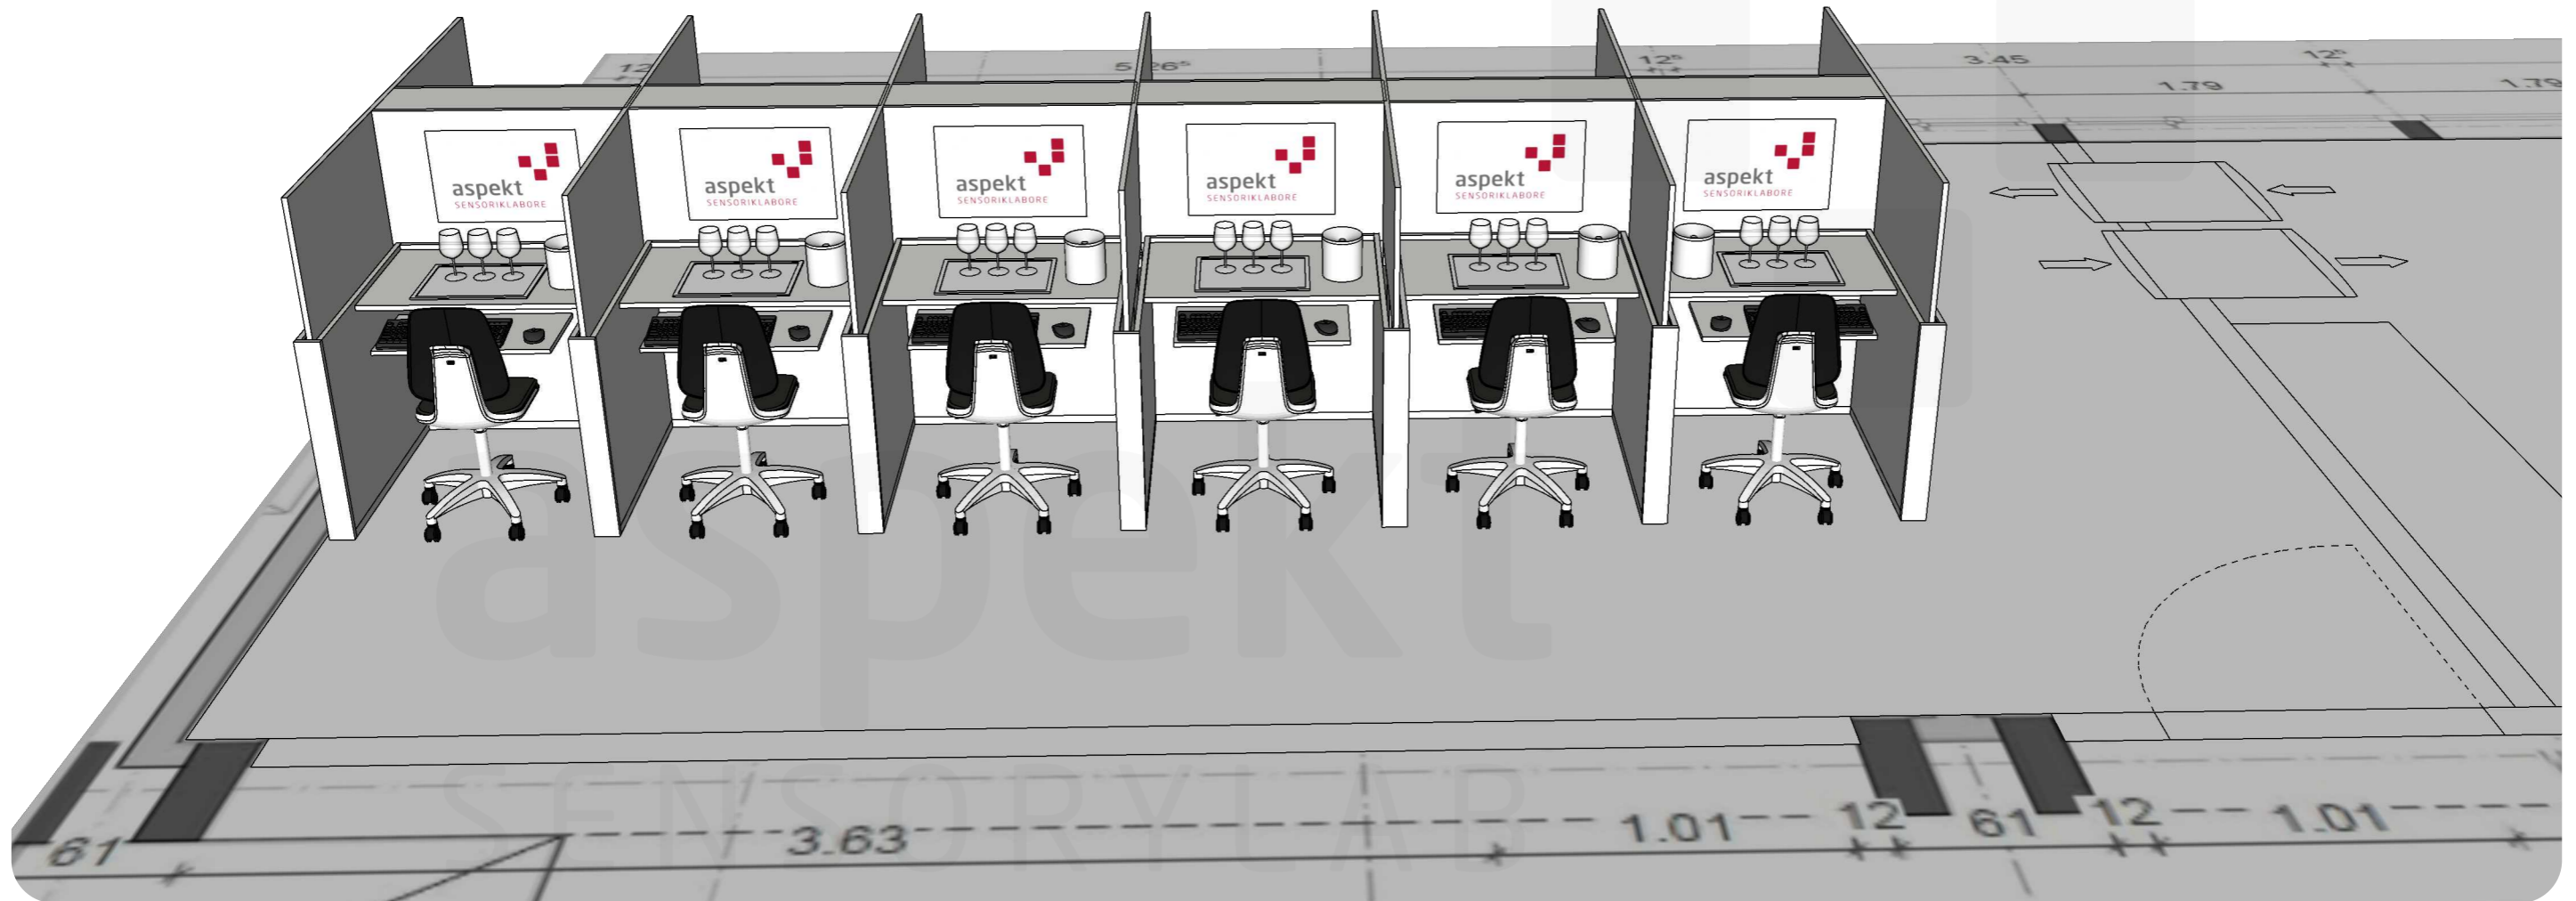

- The partition walls between the test stations can be raised and lowered by electric motor in approx. 30 seconds.

#### Presentation room:

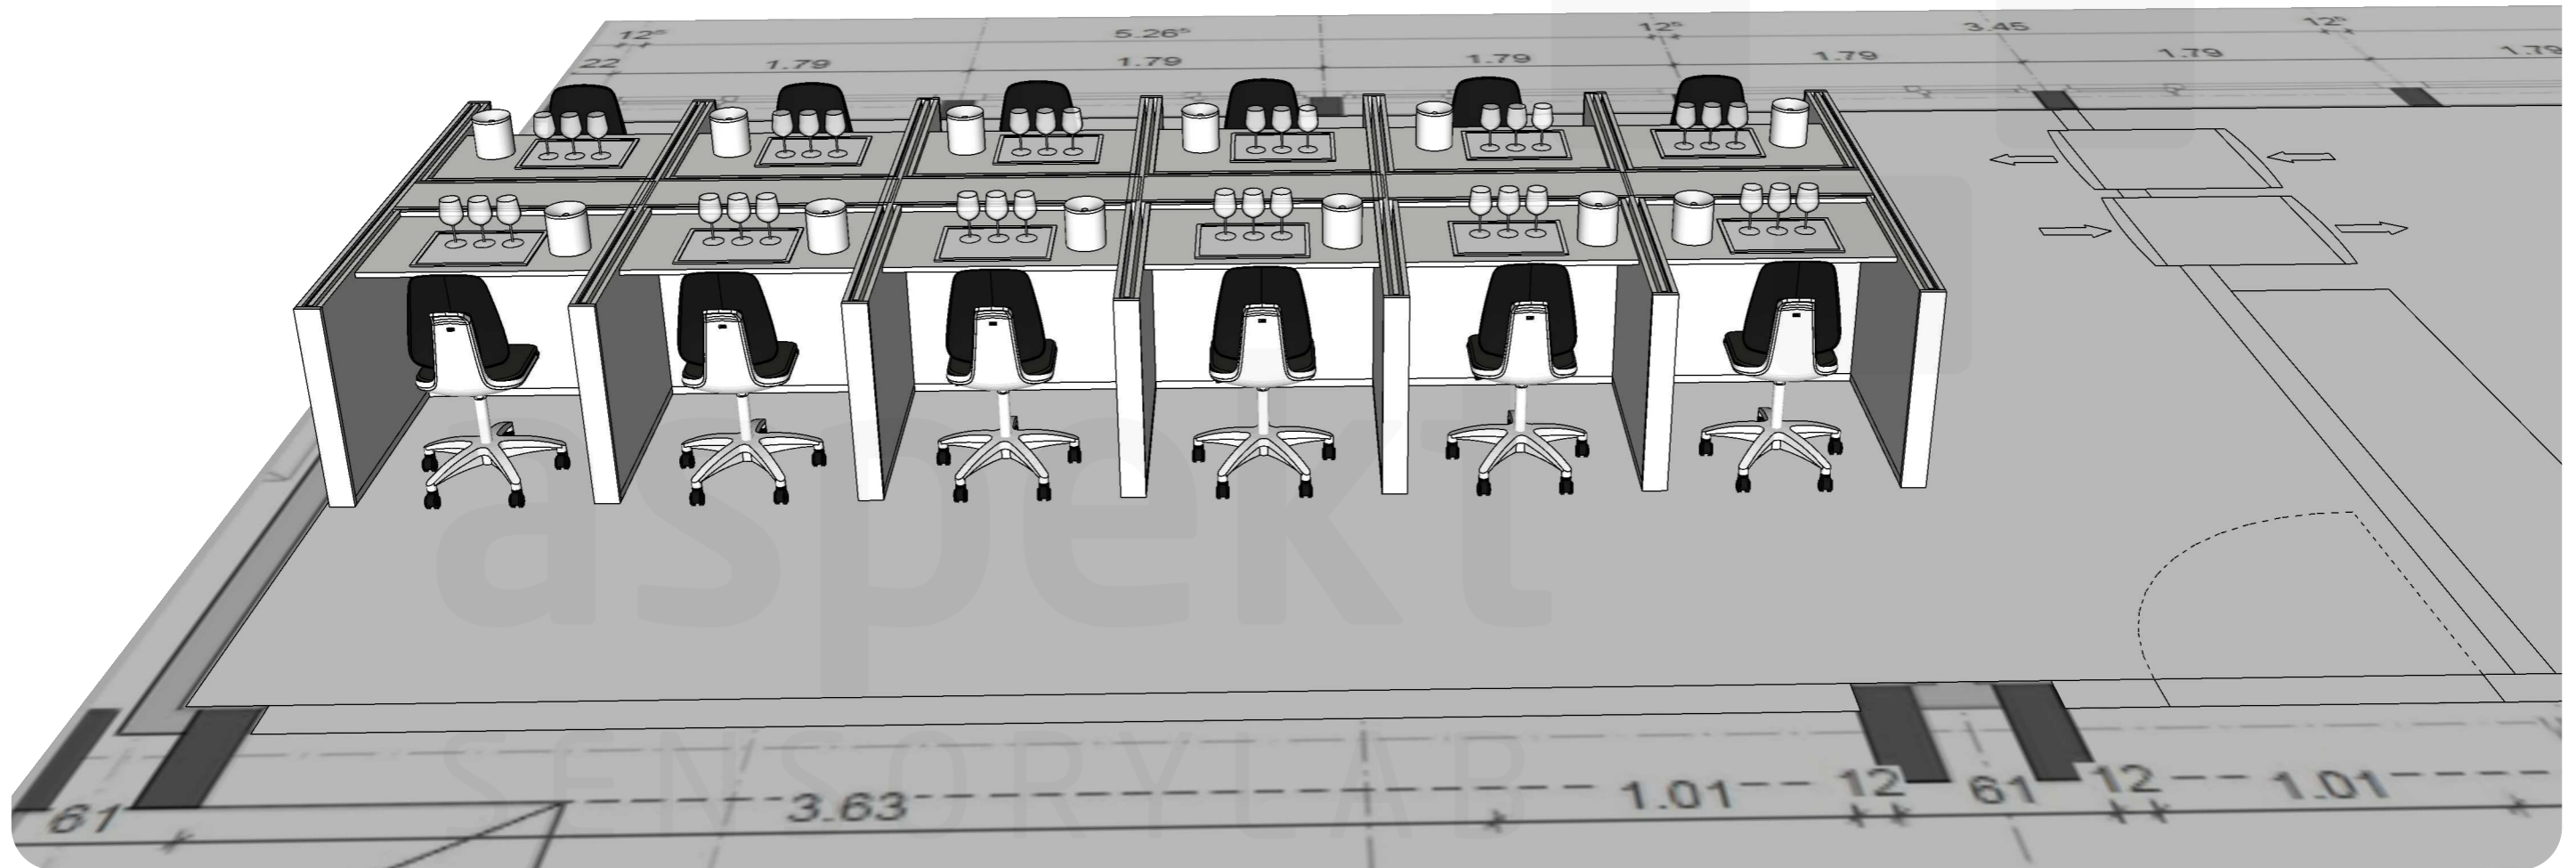

- with conference table for customer visits

#### Preparation:

- Respondent has no insight into the preparation.
- Preparation in daylight
- Preparation for "self-care" of the subjects
